

Easy Audit & Direct Skills

"We now perform safety assessments and reports in 50% of the usual time"

**- Tony Cotruzzola,
Director**

Direct Skills employ Easy Audit to ensure that the health and safety of our staff and indeed the public is maintained to a very high standard. As a Director at Direct Skills concerned with operations and health and safety, I have been **very impressed with the flexibility, efficiency, and value of both the Easy Audit product and the CMO personnel.**

The appeal for us was that Easy Audit is a **user configurable solution** that is able to seamlessly manage compliance by combining audits and checklists from our previous paper based system with other generic industry standard templates. This has allowed us to attend to our company specific safety procedures whilst simultaneously complying with the industry standards and regulations.

Using Easy Audit we now **perform safety assessments and reports in 50% of the usual time** but with 150% effectiveness. We have input all our old paper based checklists into Easy Audit, and now we can simply update these checklists as well. Easy Audit also allows us to manage our staff very effectively. As a result of the wireless capability of Easy Audit and the automated reporting from the field we have also found **a reduced need for administrative personnel.** This has ultimately reduced our operating costs.

Our Easy Audit solution includes the full company safety manual, outlining standard safety procedures, roles and responsibilities of key personnel, and risk identification. The electronic format of our safety manual has reduced hefty paperwork which is **more efficient and beneficial for our inspectors, processing personnel, and the environment.**

Easy Audit has allowed our company to create **timely and complete audit reports** with minimal faults. This precision is a result of the reduced opportunity for human error. The **reports created are both accurate and informative** and allow us to **improve our risk management decisions** and monitor site progress.

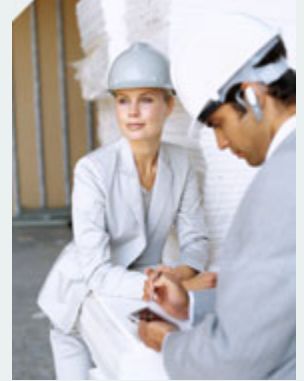

business partner

The implementation of Easy Audit within Direct Skills has resulted in a **dramatic improvement in the monitoring of health and safety** on various sites. It has reduced compliance issues and provides informative reports at the touch of a button on our PCs, PDAs, and the intranet.

For these reasons I see Easy Audit as a valuable investment for Direct Skills and suggest it would provide great benefits for businesses in a variety of industries especially those with compliance obligations.

- Tony Cotruzzola, Director
